About

Full-stack Engineer. Building delightful web experiences and polished products. I have a keen eye for design and I care deeply about the details that make great software – from seamless user interactions to performant code.

Professional Experience

Leap Wallet

Sept 2022 - Dec 2024

Full-stack Engineer, Remote

- **User Growth & Engagement:** Optimized core features at Leap Wallet, increasing weekly active users 4x through collaboration with the design and marketing teams.
- **Revenue Impact:** Built core packages and services that facilitated monetization of Leap Wallet and SwapFast, generating around \$3M in monthly volume.
- **Engineering Efficiency:** Led documentation for internal libraries & SDKs, optimized CI/CD pipelines, and improved build tooling (10x faster build times).
- **Team Collaboration:** Conducted code reviews, pair-programmed for debugging, and delivered technical presentations to foster knowledge-sharing in the team.
- **UI/UX Enhancement:** Took initiative to build a design system for our product suite and internal tools, ensuring a consistent, cohesive, accessible and high-quality user experience.
- **Code Quality & Maintainability:** Ushered in a culture of writing readable and idiomatic code, and semantic markup. Made sure the team tended to technical debt and refactoring after a high velocity development phase.

CryptoCapable

Feb 2022 - June 2022

Full-stack Engineer, Remote

- **Smart Contract Development:** Built, tested, and deployed DAOs (smart contracts) on the NEAR blockchain, implementing voting, financial transactions, and cross-contract calls to achieve a successful launch within 3 months.
- **Technical Documentation:** Created and maintained comprehensive documentation, including a detailed development wiki, to enhance team collaboration and accelerate project timelines.
- **Research & Development:** Conducted technical feasibility studies and collaborated with cross-functional teams to design and develop the gamified learning platform, supporting a phased and strategic launch.

Turtlewig

Dec 2020 - Feb 2021, May 2021 - July 2021

Full-stack Intern, Remote

- **Core Feature Development:** Built and implemented key features, including Figma-like comments with tagging, a version control system, and magic invite links, working across front end, back end, and database layers.
- **Application Robustness:** Resolved critical engineering challenges, such as race conditions in the asset processing pipeline, by designing resilient cloud-based solutions, significantly improving platform reliability.
- **Codebase Improvements:** Refactored core sub-modules to reduce technical debt, enhancing performance, maintainability, and overall developer experience.

Skills

- | | | | | |
|--------------|---------------------|-----------------|------------|-----------------------|
| • HTML, CSS | • React.js | • Express, Hono | • AWS | Tools of Trade |
| • TypeScript | • Next.js | • REST, GraphQL | • GCP | • Figma |
| • Node.js | • Tailwind CSS | • SQLite | • Firebase | • GitHub |
| • Golang | • Styled Components | • PostgreSQL | • CI/CD | • Linear |
| • Python | • Mobx, Redux | • Redis | • Docker | • Notion |

Education

B. Tech in Computer Science

8.3 CGPA · Shiv Nadar University, Noida

Higher Secondary Certificate

98.2% · Atmiya Vidya Mandir, Surat
